ENGINEERING QUALITY OF LIFE FOR HEROES

The QL+ Program brings together America's talented engineering students at leading universities to create life-transforming and novel assistive technologies for our country’s service members, veterans and first responders with disabilities and medical conditions. All of our projects are provided free of charge to these patriots.

At QL+ we realize people continue to fight to overcome their physical challenges. That’s why we call our program participants “Challengers.” QL+ projects help our Challengers with significant aspects of their lives, enabling them to be more independent, more mobile, and better able to participate in recreational activities and sports.

QL+ CHALLENGER ASSISTIVE RESOURCES

The QL+ process begins with the recruitment of Challengers with life-altering injuries and debilitating medical conditions. Leveraging the talents of engineering students at selected universities, QL+ identifies specific obstacles in the Challenger’s life that can be eased or overcome through a custom assistive device or prosthetic modification – an innovative solution not otherwise available on the market.

BECOME PART OF THE QL+ PROGRAM

Our website (www.qlplus.org) contains information on our Challengers, the solutions created, and our partner universities. We welcome the opportunity to work with you and your family to improve your quality of life.

For questions about eligibility or to become a QL+ Challenger, please contact COL Barb Springer, PT, PhD, USA (Ret.), by calling 703.442.0038 Ext 2, or emailing barb.springer@qlplus.org

OUR MISSION

To foster and generate innovations that aid and improve the quality of life for those who have served our country.
